

I am deeply disturbed by the clear abuse of the public airways demonstrated by Sinclair broadcasting.

These stations and networks use the airwaves free of charge and in response are to serve the public good and community interest.

Sinclair Broadcasting is choosing to be blatantly partisan and apparently cooperating with an incumbent government in specific political goals. This is the essence of anti-democratic anti-American behavior.

The airwaves are the property of the people of America not the current government or the broadcasters. I believe strongly that this is a result of media consolidation and strongly oppose further relaxation of the media ownership rules. In addition Sinclair should be required to provide equal time to those partisans who are opposed to the message the corporation is promoting. This would be the best way to serve the public interest.

with regards, Russ McBrien
